

Volkswagen Golf/GTI MK5/MK6 Rear Seat Delete Install Instructions:

1. First you will need to remove your rear seats
 - a. Pull up and forward on the front edge to release the lower cushions.
 - b. Lower the rear up rights, on each end you will see where the seats clip into the body of the car. Take a large flat head and push the collar towards the back of the car to release the seat uprights.
 - c. Once the collar is released pull up on that end and pull away from the middle of the car, the seat should start to slide away from the center support.
 - d. Once they are removed disconnect the middle seatbelt to remove the seat completely.
2. Next it's time to install your new seat delete.
 - a. First insert the top piece closet to the front of the car followed by the front lower piece.
 - b. You will want to drill three pilot holes, one about five (5") inches in on the ends and one in the middle through the front top piece to attach it to the front lower. We recommend pilot holes so that the screws do not pull the carpet.
 - c. Now using the three screws provided, screw the two pieces together. (Be careful to not over tighten)

Your Euro K creations rear seat delete is now complete! If you have any issues or comments please feel free to contact us at sales@eurokcreations.com
